Metric

Metric: K12: Mean scores on family surveys, such as the Panorama Family-School Relationships Survey or CORE Districts School Culture & Climate Survey parent assessment of school-community engagement.

Use the following CEDS elements to determine the school year:

- **School Year** = the most recent school year or the school year being reported, representing July 1 through June 30.

To determine the universe of families:

- Pull all unique families which is determined by using the **Family Identifier**

Where the family

- is associated with an organization through the **Organization Identifier** where **Organization Identification System** = SEA, and
- is associated with a family member through the **Person Identifier** where **Person Identification System** = School and **Person Relationship Type** = Family Member

Determine the families that responded to the survey:

- Pull all unique assessments which is determined by using the **Assessment Identifier**, where
- **Assessment Type** = Survey,

- Formula: Mean = (Sum of all scores) / (Number of families)**
